PORT CHESTER, N. Y.

PACKING.

We call the attention of our clients in foreign countries to the careful manner in which we pack our stoves for export.

The crates are made from lumber of the best quality, strong but light in weight, and the stoves are securely cleated in them, so as to avoid their working loose in transit.

The crates are thoroughly strengthened with iron corners and thus are able to stand long journeys by land and sea without breakage.

SPECIFICATION ON ORDERS

To insure orders being executed correctly they should specify:

- 1st. Name of stove.
- 2nd. Page of Catalog.
- 3rd. Number of stove.
- 4th. If for coal or wood.
- 5th. If nickel ornaments are desired or not.
- 6th. If order is for Heaters, state whether for steam or hot water.
- 7th. Marks and numbers to be put on packages.
- 8th. How goods are to be shipped and to whom consigned.
- 9th. How payment is to be made.

OUR TERMS

Local orders payable ten days after shipment of goods.

Foreign orders, funds in hand or letter of credit on responsible banking house to cover value of shipment or through one of the New York Export Commission houses.

DELIVERIES

Our goods are delivered free of charge to Steamer New York, on orders of 10 or more stoves or equivalent value of other goods.

On smaller orders we charge cartage at cost.

SPECIAL NOTICE

We are not responsible for goods after having delivered them in good order and condition to Railroad or Boat in this city and taken the carrier's receipt showing the fact. Sometimes the carriers insist upon our signing a "release," having reference to their liability for damages, etc.

In such cases, of course, we have to do so; but that does not in any way affect the right of consignee (who is the real owner) to claim and recover damages for any carelessness or negligence on the part of the carrier.

It must, therefore, be clearly understood that after we have delivered goods to the carrier, properly consigned, the ownership has passed from us to the consignee, and that we, as shippers, have no claim against the carrying company.

We cannot accept the cancellation or countermanding of orders without our consent, more particularly in the case of goods that differ in any way from our regular stock goods.

No goods insured unless so ordered.

All freight secured at lowest rates.

LYNWOOD B

FOR COAL OR WOOD.

YORK RANGES

Our York Ranges embody the latest improvements in construction and design and we make several styles adapted to all needs.

They can be furnished plain or with the following attachments: High Warming Shelf, High Warming Shelf with Gas Stove Attachment; High Warming Shelf with Boiler Brackets; Horizontal Round Head Boiler, eighteen to twenty-eight gallons, with galvanized pipes; Elevated Gas Oven with Gas Stove Attachment. (The Gas Stove Attachment can also be furnished with Warming Shelf and Brackets for Horizontal Boiler.)

The Elevated Gas Oven consists of two Ovens, each 16 inches square, one for baking, and one for broiling, with right or left connection, and with it our Drop Gas Stove Attachment, making a most complete combination.

Coal or Wood may be used on all these Ranges.

No. 73 YORK

Six-hole Range, with or without Water Back, right or left fire, Skeleton Low Closet. Shown with High Warming Shelf.

This Range has Front Nickel Oven Shelf; Cast Iron Nickered Knobs; End Draft Slide, Nickel Broiler Door. Can be furnished with Oven Thermometer, Gas Drop Shelf, Elevated Gas Bake and Broiler Ovens, if desired.

Please refer to the article by name and number, without tearing out pages

No. 8-20 YORK A

With High Warming Closet.

These ranges have 6-8 inch holes, Full Low Closet, and can be furnished with Oven Door Thermometer, when desired; with or without Water Back; right or left fire. In portable form only.

Contain Duplex, Dock Ash or Flat Grate, which may be drawn out through the front without disturbing the Water Back, Brick or Bed-Plate. Lift-Out Sifting Grate, large Nickel Plated Broiler Door, Ash Pan, Foot-Opener, Check Damper, large Clean-out in Oven, Top End Shelves; removable nickeled cast iron bands on Top of Range, Oven Hearth and Top End Shelves.

We call attention to our High Warming Closet, which is made of polished Sheet Steel; Nickel Trimmed and with Nickel Draft Slide. Practical in construction and deriving additional heat from the smoke pipe, which passes through it.

Code Word.....	Alicate
Size of Oven.....	20x18½x12 in.
Size of Top, with Shelves.....	53½x28½ in.

No. 3 YORK

Double Oven Range, with Full Low Closet, Canopy and High Warming Closet.

Code Word.....		Height to Top of Canopy.....	Algozil
Size of Each Oven.....	19½x14x12¼ in.	Weight, crated.....	81 in.
Size of Fire Box.....	14 in.	Measurement, crated.....	700 lb.
Height to Top.....	30¾ in.		22 c. f.

This handsome range is especially adapted for large private dwellings, hotels, restaurants, etc., having 12-8 inch holes and presenting a large cooking surface.

We would call attention to the protected location of the ovens, having only the front surface exposed to the air, keeping the heat concentrated, and therefore, requiring less fuel to obtain the same results than where the ovens are more exposed. Each oven is equipped with an Oven Thermometer if desired.

The Double High Warming Closet with four Nickel Cup Racks make this range especially convenient. It will be noted that the smoke pipes pass through these Closets, again effecting economy of heat.

Code Word Alibania
 Size of Ovens 20x18x12 in.
 Size of Fire Boxes 14 in.
 Height 54 in.
 Weight, crated 1100 lbs.
 Measurement, crated 50 c. f.

YORK LAUNDRY STOVE

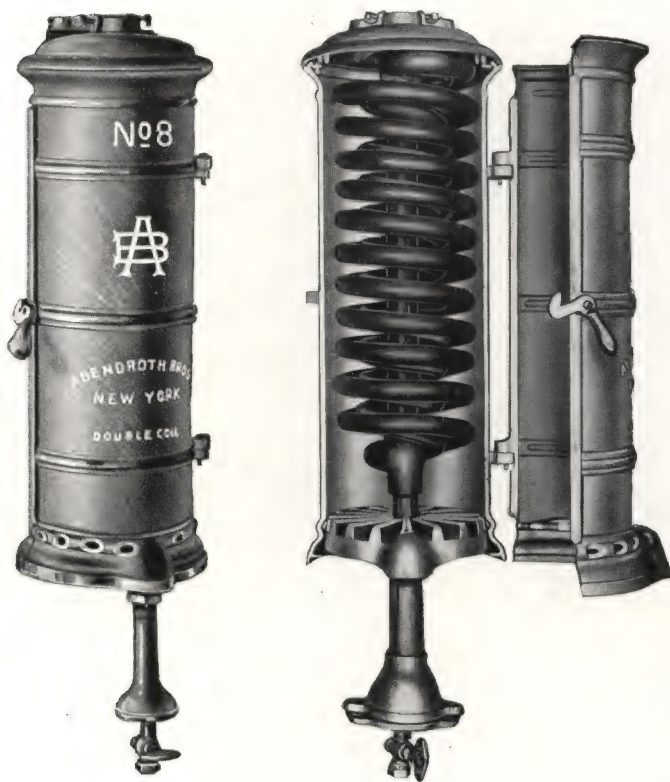

No. 3 LAUNDRY

This stove is fitted with three single Burners, and galvanized iron under shelf. The Top will accommodate two ABENDROTH IRON HEATERS. It is an ideal stove for a wash-boiler, having its three burners in a row and close enough together so that all three may be brought to bear on the Boiler at once, insuring quick and effective work. The height of this Stove, too, has been designed with a special view to laundry requirements.

No.	Code	Height	Length	Depth	Price
3	Wash	22 in.	28 in.	14 in.	\$8.50

When fitted with three powerful Giant Burners, add
for each burner, extra.....List, .25

YORK GAS WATER HEATERS

No. 8. Double Coil. (Closed.)

No. 8 Double Coil. (Open.)

Code Word.....Doco

It has been proven by test that the York Gas Water Heaters are more efficient and give better results for the amount of gas consumed, than any other on the market.

The No. 8, with Double Copper Coil, is superior to all others in construction, and the most powerful independent heater made. This heater has our own patent Double Copper Coil, with additional centre heating surface, which, with an exceptionally powerful burner, gives excellent results. The Casing is constructed of Cast Iron, and may be easily removed. The Cast Iron Door extends the full length of the heater, giving ready access to the Coil, for cleaning purposes.

Our "Yorkette" heater is of the same construction as No. 8, but has only seven turns of coil instead of eleven.
